Don't Let Regulation Crush Innovation – Support Hemp Freedom in Missouri!

Join our coalition today to protect Missouri's hemp industry! Call a member for more information on how you can get involved, sign petitions, and help spread the word. Together, we can ensure fair regulations that promote safety without stifling growth.

Stand With Us

Farm Bill Approved Since 2018

Hemp with less than 0.3% THC is federally legal; state laws should respect this and not impose harsher restrictions.

We Want Regulations

We are committed to protecting kids & implementing innovative solutions that will help create a better tomorrow for everyone.

Market Dominance

The claim that only dispensaries can ensure the safety and regulation of hemp products disregards the strict regulations already followed by many Missouri businesses.

Scare Tactics

The push to transfer hemp sales exclusively to dispensaries uses unfounded public safety concerns as a guise for enabling a takeover by larger cannabis interests.

Join MHTA In Saving The Hemp Industry

Support Local Businesses

- Protect over 8,000 Missouri businesses that could face unnecessary restrictions or even closure.
- The hemp industry significantly contributes to the local economy, supporting jobs and community development.

Defend Federal Legality

- Hemp with less than 0.3% THC is federally legal; state laws should respect this and not impose harsher restrictions.
- Hemp and marijuana are distinct; conflating the two under the same restrictive rules is scientifically and legally unjustified.

Promote Consumer Choice

- Ensure Seniors and Veterans have access to hemp products in convenient locations without unnecessary hurdles.
- Hemp products offer numerous health benefits and should remain accessible to those who rely on them.

Encourage Industry Growth

- Help the hemp industry continue to innovate and thrive without being overshadowed by the cannabis market.
- Existing regulations ensure that hemp products are safe and non-intoxicating; further restrictions are unnecessary and burdensome.
